WHAT IS ACCOUNTING?

Accounting involves carrying out the fundamental tasks of preparing, analyzing, and verifying financial documents in order to provide information to clients. Accountants and auditors help to ensure that businesses are run efficiently, public records are kept accurately, and taxes are paid properly. Accounting also provides the opportunity to analyze and influence corporate strategies, evaluate new business opportunities, and develop a wide set of business skills. Government accountants maintain and examine the records of government agencies and audit.

WHAT CAN I DO WITH THE MAJOR?

The accounting major prepares students to work within the accounting industry in a wide range of roles. Public accountants perform a broad range of accounting, auditing, tax, and consulting activities for their clients. Management accountants record and analyze the internal financial information and manage the budgets of the companies for which they work. Internal auditors verify the effectiveness of their organization's internal controls and check for mismanagement, waste, or fraud.

Accounting also provides a strong business foundation which can be a springboard into other industries, including finance, law (often with a specialization in tax), management (such as a CFO of an organization), and public policy. A PhD in Accounting can also lead towards a career as a professor at the University level, teaching either undergraduate or graduate students.

Yeshiva University

SHEVET GLAUBACH CENTER FOR CAREER
STRATEGY AND PROFESSIONAL DEVELOPMENT

SKILLS AND ABILITIES

- Active learning
- Analytical and problem-solving skills
- Critical thinking
- Mathematical and deductive reasoning
- Organization and attention to detail
- Strong written and oral communication
- Systems analysis
- Teamwork/Leadership
- Time management

Technical Skills

- AI
- Fund Accounting Software
- Intuit QuickBooks
- Proficiency with Microsoft Office Suite
- Python
- Sage 50 Accounting
- Tax Prep Software (ATX Total Tax Office; Intuit Lacerte, etc.)

GRADUATE AND PROFESSIONAL PROGRAMS

Students seeking to become certified public accountants (CPA) in New York State (as well as in most other states) are required to complete 150 credits, of which 33 are accounting credits. Please note, this number of credit hours is beyond what is obtained in a traditional undergraduate degree.

An MBA in Accounting is an option for students to consider as they prepare for the CPA exam and leads to jobs in business accounting administration.

Top Accounting MBA Programs to consider are:

- University of Illinois—Urbana Champaign
- University of Pennsylvania (Wharton)
- University of Texas—Austin (McCombs)

U.S. News and World Report, Best Accounting Programs, bit.ly/2ulvfM8

Alternative to the MBA in Accounting, students can opt for MS in Accounting or an MS in Taxation at the Sy Syms School of Business. These programs can be completed in one-two years and provide the credit hours needed to meet state requirements.

For more information visit, yu.edu/accounting or yu.edu/taxation

Graduate school is an investment you will want to research thoroughly to better understand what you can expect to get out of your degree both academically and professionally.
