WHAT IS CONSULTING?

Consulting is a massive, international industry with global revenues of around \$470 billion. It spans human resources, business advisory services, information technology, operations management consulting, health care administration, education and many other fields. Workers in this field—consultants—provide expertise to organizations to help them maximize profits or effectiveness and keep them running smoothly. They are professional “problem-solvers for hire.” Consultants are key players in today’s business world, and their star will only rise in the future.

OUTLOOK

Consultants usually work for one of three types of employers: generalist management consulting firms, specialist or “boutique” consulting firms, and internal corporate consulting divisions. Many large consulting firms have offices throughout the United States, and top firms also have offices worldwide.

According to the U.S. Department of Labor, as cited by the Vault Career Guide to Consulting, employment in the consulting industry is expected to grow 14% from 2020 - 2030.

Many factors can impact consulting, including globalization, new technology, government legislation, business trends, and more. As a result, requirements for job candidates are changing to respond to the needs of the industry.
