WHAT IS MEDIA AND ENTERTAINMENT?

The media and entertainment industry consists of film, print, radio, and television. These segments include movies, TV shows, radio shows, news, music, newspapers, magazines, and books. The print industry consists of publishing companies that produce newspapers, magazines, books, journals, and periodicals, their online versions, and directories, mailing lists, software publishing, and video games. The film industry is mainly composed of large, multinational corporations, major studios, and independent studios. Many of the top-name film companies are part of larger media conglomerates that also include television, cable, newspaper, and magazine organizations. Within the film industry are subsectors: film production, film exhibition, and film post-production.

OUTLOOK

From 2020–2030, employment within the media industry is expected to grow 14%, resulting in approximately 151,500 new jobs according to the U.S. Department of Labor.

According to the Media and Entertainment Firsthand Guide, trends impacting the industry include the digitization of content and capturing readers/consumers attention. Access to media and entertainment content through tablets and smartphones impacts content consumption as well.

Film and radio are impacted by developing technology as well. 3D format for film is becoming a more popular medium as well as IMAX format, impacting the way films are produced. For radio, focus is shifting toward video content.
