THE CODE

WHAT IS PSYCHOLOGY?

Psychology is the science of behavior and mental processes. Many psychologists use scientific methods to study behavior, while others are professional practitioners who use psychological knowledge and technology to help solve individual and social problems. General areas of psychology include learning and memory, sensory systems and perception, and thought and language. The department offers a wide variety of courses in clinical, biological, experimental, developmental and social psychology, as well as advanced courses and seminars in specialized areas. While the core requirements of the psychology major are designed to provide a broad foundation across the spectrum of subject areas in psychology, students are also trained in statistics and research methodology. Writing skills are highlighted in much of the coursework, and students are encouraged to expand their learning outside of the classroom by participating in research and/or clinical experiences with/or sponsored by psychology faculty.

WHAT CAN I DO WITH THE MAJOR?

Psychology graduates develop many transferable skills which can be applied to a wide range of career fields. Graduates pursue careers in clinical psychology, counseling, school, industrial/organizational psychology, health, and/or social psychology or in allied fields including medicine, dentistry, allied health (OT, PT, nursing, SLP), law, social work, the rabbinate, and education. Others have decided to apply their knowledge to the business world in human resources, public relations, advertising, and sales.

CAREER TRACKS

Students majoring in psychology develop many transferable skills which can be applied to a wide range of career fields. Directly related areas of focus can include clinical work, teaching, and/or research. Clinical careers can include therapy, counseling, and psycho diagnostic testing and evaluation. Clinical/Counseling psychology graduates can become licensed providers in either social work or psychology.

Within the field of psychology, there are several degrees from which a student can choose:

- Clinical/Counseling Psychology (PhD or PsyD)
- Industrial/Organizational Psychology (MA or PhD) in I/O psychology, students can consult businesses/industries regarding psychology in the workplace Mental Health Counseling (MA)
- Research students can complete a Ph.D. in a number of areas that would prepare them for a career in academia, or research (neuroscience, social, experimental, developmental, and others)
- School Psychology (MA, PsyD or PhD)

Additionally, psychology majors are prepared to attend graduate school in a variety of related fields, education, public health, OT/PT, medicine, dentistry, law, business, communications, social service, marketing, social work, and many other areas.

GRADUATE AND PROFESSIONAL PROGRAMS

The **APA** (American Psychological Association) has a credible website that lists graduate programs according to psychology specialties nationwide that are approved by this professional association including Master's and PhD/PsyD programs. Also, some psychology majors who want to be "therapists" often pursue a Master of Social Work. For a comprehensive listing of programs, log onto **NASW** (National Association of Social Workers). Some professionals also continue their education by enrolling in a post-graduate institute training or an MPH (Master of Public Health) to study psychological issues on a macro level.

Please note that YU has a well-respected graduate school of psychology,

Ferkauf Graduate School of Psychology. Which offers four programs:

- | | |
|--|--|
| ■ <u>Clinical Psychology (PsyD)</u> | ■ <u>Mental Health Counseling (MA)</u> |
| ■ <u>Clinical Psychology Health Emphasis (PhD)</u> | ■ <u>School-Clinical-Child Psychology (PsyD)</u> |

Additionally, YU has a school of social work, **Wurzweiler School of Social Work**. Which offers the following programs:

- | | |
|--------------------------------------|---------------------------------------|
| ■ <u>Certificate Programs</u> | <u>Social Work and Social Welfare</u> |
| ■ <u>Master of Social Work (MSW)</u> | <u>(PhD)</u> |

Graduate school is an investment you will want to research thoroughly to better understand what you can expect to get out of your degree both academically and professionally.
