Leora Betesh

Algorithm Engineer at RTC-Vision Ltd.
Mevo Horon, Judea and Samaria District, Israel

Summary

I am finishing up a Machine Learning Bootcamp at Deep Learning Academy, and working on a sound detection research project at Digital Signal Processing group.

Experience

RTC-Vision Ltd.
Algorithm Engineer
November 2019 - Present
Israel

DSP Group
Research Intern
June 2019 - November 2019 (6 months)
Herzliya Area, Israel

- Converted sound files to spectrograms for use in image-trained neural networks, for sound recognition
- Set up prototype of Transfer Learning, with a CNN which was trained on large dataset of YouTube videos, and extending it to a small dataset of custom sounds
- Researched leveraging visual components of YouTube videos for sound recognition in unlabeled data

Deep Learning Academy
Machine Learning Student
February 2019 - November 2019 (10 months)
Tel Aviv Area, Israel

Five month full time bootcamp included these topics:

- Statistics, Linear Algebra, PCA, t-SNE, loss functions, cross validation
- Regression, decision trees, SVM, K-means, clustering, NLP, Markov models, Grid Search
- Deep learning: DNN, CNN, RNN, network architectures
- Languages and packages: Python, TensorFlow, TensorBoard, Keras
- Class exercise submissions: <https://github.com/leora-betesh/ml-bootcamp>

Suite Solutions, Ltd.
Team Lead and Senior Developer
2008 - 2018 (10 years)
Jerusalem, Israel

- Designed and developed automated solution to generate flowcharts from XML for large appliance company.
- Developed program to convert MS Word files to XML for Israel Aerospace Industries.
- Created automated conversion tool from legacy unstructured content to Confluence Wiki Markup.
- Front-end web development for customer web GUI's, using the Bootstrap framework for mobile-friendly sites.
- Added features such as multi-lingual support, cross-browser video support, glossaries, PDF links, feedback pages, change tracking, 508 Compliance, and multiple-skin options.
- Wrote Apache ANT targets to retrieve and process complex data.

UBS
Senior Associate
2001 - 2006 (5 years)
New Jersey

- Detected anomalies across several user authentication applications using a self-created Sybase database, and worked to remediate and prevent anomalies.
- Created security reports reviewed by Chief Information Officer to monitor employee access to sensitive applications.
- Gathered PC inventory data of ~5000 users and set up a database and UNIX shell scripts to store and access data.
- Improved and made more efficient the data warehouse used to report trade data of several brokerage firms.

Kayla Boldt-Povarsky

GTP Analyst at UBS Asset Management
New York, New York

Summary

Experienced Analyst with a demonstrated history of working in the financial services industry. Skilled in Computer Science, Bash, Databases, Data Science, and Discrete Mathematics. Strong business development professional with a Bachelor's degree focused in Computer Science from Yeshiva University.

Experience

UBS

GTP Analyst
August 2019 - Present
Greater New York City Area

UBS

Asset Management Data Analyst
June 2018 - August 2018 (3 months)
Greater New York City Area

University of California, Los Angeles

Research Assistant
June 2016 - August 2016 (3 months)
Greater Los Angeles Area

Helped gather and analyze data involved in the research into the origin of life and consciousness with Professor Katsushi Arisaka. Used MatLab to find patterns in C-Elogen's movement and decision making.

Yeshiva University Stern College for Women

Teacher's Assistant for Introduction to Computer Science Class
January 2016 - May 2016 (5 months)
Greater New York City Area

Assisted students with Computer Science labs and homework. Consulted with students regarding Python programming.

University of Southern California

Research Assistant and Shadow
June 2015 - August 2015 (3 months)
Greater Los Angeles Area

Used three-dimensional software, such as Fujifil's Synapse 3D, Vital Images' Vitrea, and Matlab, to measure and record the calcification in the aorta of various patients, gathering necessary data for innovative heart research.

Miriam Herman

Advisory Associate at PwC
New York, New York

Summary

As a Technology Consultant at PwC, I support banks and other financial services institutions in solving their most important technology problems. Specifically, I advise on large scale technology infrastructure projects, with a specialty in Cloud Computing and Networking.

Experience

PwC
Associate
December 2017 - Present
Greater New York City Area

Digital Technology & Cloud

Yeshiva University
MA Mathematics
September 2016 - November 2017 (1 year 3 months)
Greater New York City Area

Thesis in Applications of Neural Networks applied to Named Entity Recognition of structured data sets.

Research in K-Theory pattern propagation and analysis

Courses in Probability & Statistics, Chaos, Differential Equations

- Planned 'Write for a Living' bi-weekly coding seminars with 6 professional mentors and 40+ attendees
- Helped plan InventYU Hackathon with 250+ participants
- Developed marketing strategy and advertisements for Stern College for Women Mathematics Department
- Organized Women in Mathematics Networking Event for 8 businesses and 25 attendees

Universa Investments L.P.
Applications Engineer

August 2014 - September 2016 (2 years 2 months)

Universa is an investment management firm that specializes in tail hedging as a means to enhance long-term equity returns. Universa portfolios are, by construction, exceedingly positively-skewed, robust to extreme risk assumptions, and non-linear to common risk factors.

Ariela-Alpha International

Business Analyst Intern

January 2013 - August 2013 (8 months)

With a team of business analysts, I worked on instituting a business intelligence solution that converts raw data into meaningful metrics for analysis. The solution provides quick and easy queries on the BI data warehouse, allowing all the staff access to the information they need to make decisions.

I documented the Data Warehouse and all its Data Marts using Mindjet down to the most granular SQL source code for each fact table. I also assisted the sales department in order -cancellations, web analytics, and data cleaning.

University of Toronto

Undergraduate Research Assistant

May 2012 - August 2012 (4 months)

During my summer at the University of Toronto I assisted with programming, problem solving and troubleshooting for various projects including; a new search engine for emergency room doctors. (funded by Google) and an iPhone app designed to present Toronto events.

Most of my time was spent working to create a social iPhone app using Perl. The app allowed users to search for events according to calendar, interest and price, and my work created the database. Using Perl I scraped websites for event data which was syndicated on our blog and event database.

As well, I cleaned and examined physio therapy data from hundreds of nursing and retirement homes to determine where, when and why the most seniors were falling, and which falls caused the worst wounds. The results found were used to improve the Falls Prevention Plan and for marketing for the retirement homes.

I also attended weekly lab meetings and discussed current projects with team members.

Shira Neumann

Senior Software Engineer at Data Age Business Systems Inc.
Rockville, Maryland

Summary

Experienced full stack Software Developer with a demonstrated history of working in the health wellness and fitness industry. I am continually driven to learn and gain knowledge in all aspects of the software development life cycle – resulting in greater responsibilities in my current position to not only investigate issues, but to also provide code fixes for review and develop features to meet customer needs. I continue to grow in my passion for technology and wish to find a career that can maximize both my talent and drive in this industry. With my deep understanding of OOP and design patterns, I strive to write efficient, legible and maintainable code – focusing on quality.

Experience

Data Age Business Systems Inc.
Senior Software Engineer
January 2020 - Present

Employee Navigator, LLC
.NET Developer
October 2019 - January 2020 (4 months)

Motionsoft
5 years 8 months
Software Developer
October 2017 - October 2019 (2 years 1 month)
Rockville, MD

Full stack developer for MoSoClub – a lightweight, cloud based, membership management system written primarily in C# with .NET MVC framework.

Responsibilities Include:

- Design and develop new features – delivering high quality software to customers and enhancing the user experience.

- Create and review epics, user stories and workflow diagrams to develop solutions according to specifications and requirements.
- Coordinate and assist with deployments to QA and production environments
- Code review and assist colleagues on coding best practices. Participate in and lead in peer code reviews and Product Management meetups
- Work closely with Product Management in prioritization and estimation exercises – ensuring customer needs are met in a timely manner.
- Experience working in an agile environment and working with a Scrum team structure using JIRA system
- Resolve bug issues in the .NET MVC framework using C#, Razor, Web Forms, HTML, JQuery, Javascript, CSS and SQL
- Optimize existing SQL code and maintenance utilizing database skills: ad-hoc queries, functions, stored procedures and indexes
- Perform DevOps tasks such as build deployments, database migrations, IIS maintenance and AWS Code Deploy configuration
- Create new or maintain existing CI/CD pipelines
- Develops new API interfaces to integrate with 3rd party vendors

Junior Software Developer

May 2016 - October 2017 (1 year 6 months)

Rockville, MD

Full stack developer for MoSoClub – a lightweight, cloud based, membership management system written primarily in C# with .NET MVC framework.

Responsibilities Include:

- Develop bug fixes in C#, Razor, JQuery and SQL for issues reported through bug-tracking ticket system – ITS and JIRA
- Perform DevOps tasks such as build deployment and database migrations
- Participate in joint code reviews and Product Management meetups
- Understands HTTP and associated protocols, transports, and methodologies such as REST, JSON, XML, AJAX

Technical Support Engineer - Tier II

January 2016 - May 2016 (5 months)

Rockville, MD

Combine business and technical knowledge to determine the most appropriate approach to meeting a business need

Specific Responsibilities Include:

- Liaise between Tier I and Tier III Support Teams. Review escalated Tier I tickets and escalate to Tier III with detailed analysis of issue.

- Create complex SQL scripts to identify, cleanup and monitor daily data issues that may arise
- Tune poor performing SQL scripts for improved Ad Hoc reporting
- Manage Umbraco (CMS) system by creating custom HTML/CSS/JQuery code per client requests
- Manage and maintain AWS database for internal troubleshooting of software issues - includes retrieving and restoring databases
- Work with Implementations Team to create custom Javascript code for SaaS product to retrieve client data

Tools being utilized:

Microsoft SQL Server, Powershell, Command Line, IIS Manager, Visual Studios, LiveCycle, Remote Desktop Connection (Virtual Machine)

Languages currently working with:

SQL, C#, HTML, CSS, Javascript, JQuery

Technical Support Engineer - Tier I

March 2014 - January 2016 (1 year 11 months)

Rockville, MD

- Work with clients directly to resolve issues without changing source code. Resolution can include backend changes, configuration changes, external customization (without impacting code-source) etc.
- Provide workaround and bring down the severity and priority of an issue
- Work with Managed Services to resolve configuration related problems
- Combine business and technical knowledge to determine the most appropriate approach to meeting a business need
- Troubleshoot CMS and provide solutions which includes configuration changes and code changes using HTML/CSS/JQuery
- Monitor Microsoft SQL Server Management Studio and tune poor performing SQL scripts
- Maintain internal AWS database for troubleshooting of software issues

Style My Life

Web Manager / Head Graphic Designer

June 2013 - March 2014 (10 months)

- Assist with launch of online clothing company based in NYC
- Utilize Google Analytics and SEO to help market and manage the website data

- Using Wordpress, manage web content on website

www.shopstylemylife.com

- Edit model photos by modifying lighting/background with Adobe Photoshop
- Contribute to content on social media platform, such as Facebook and Instagram page

Yeshiva University

Web Editor of The Observer

January 2013 - January 2014 (1 year 1 month)

- Maintain operation of website of Yeshiva University's official newspaper (www.yuobserver.org)
- Manage website content using WordPress by updating information such as layout and content
- Edit HTML/CSS/PHP coding in background website layout

Yeshiva University

Student Media Support Specialist

June 2012 - January 2014 (1 year 8 months)

- Utilize database system, using MySQL, to retrieve information and manage system with Altiris
- Trained in CMS to edit HTML content and layout on Academic Computing website page (<http://www.yu.edu/its/academic-computing>)
- Setup and assist users with AV equipment when needed (ex, microphones, projectors, conference calls)
- Troubleshoot and assist users with personal laptops, University desktop computers, and AV equipment
- Create and manage excel spreadsheets for inventory management of academic and technical equipment
- Enter service tickets into help desk software application (Remedy)

Cayla Schwartz

Production Coordinator at Flypack New York
Brooklyn, New York

Summary

After graduating from Yeshiva University in 2016, I have been working as a production coordinator in the mobile video production industry. I have served as a first point of contact for clients, assessing their needs and providing solutions to ensure seamless shoots.

I'm looking for a change of pace, or industry, to align with my interests of urban farming, green systems & food justice non-profit work. Ideally, I would like to be in position where I can contribute to a community through food. Currently, my greenest project is my home garden, where I'm growing tomatoes, peppers, arugula, and plenty of herbs!

Experience

HEBREW ACADEMY OF LONG BEACH

Substitute Teacher

February 2019 - June 2019 (5 months)

- Execute lesson plans left by the absent teacher
- Manage classroom of 25+ students (grades 1-8), monitoring and reporting student behavior according to school policies
- Daily multitasking, quick thinking, and adapting to new situations with a flexible attitude

Flypack New York Inc.
